

# DARWIN

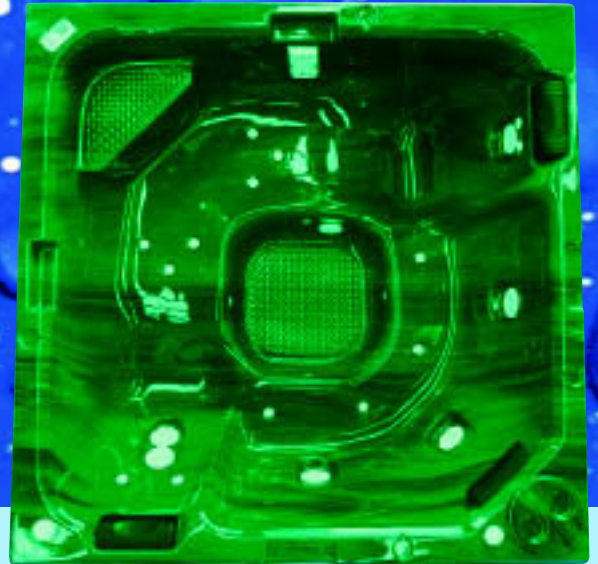

GREAT VALUE 5 SEAT SPA WITH DOUBLE RECLINER

# DARWIN

## STRENGTH & RIGIDITY

All Barrier Reef spas are built to last. Barrier Reef has used all the latest in hot tub technology to give you a strong and reliable spa.

**DIMENSIONS** 1880mm x 1880mm x 710mm

## A BARRIER REEF SPA CROSS-SECTION

### WIDE EDGE BEAMS

Barrier Reef spas have the widest edge beams on the market, giving you and your family extra safety and sleek, modern styling.

### TILED EDGE

A moulded tile edge surrounds the spa to give extra support and strength.

### FULL WESTERN CEDAR WRAP

The Canadian cedar serves to give your spa an attractive finish and a sweet, cedar smell. Both water and white ant resistant, this cedar wrap will last for years.

### CABINET

Fibreglass moulded cabinet inner and base. This adds further strength and insulation to the Barrier Reef spa.

### SOLID FIBREGLASS BASE\*

The spa's base prevents heat from escaping through the floor and helps give the spa added strength.

### SOLID CONSTRUCTION

Cabinet is fibreglass laminated onto the spa to increase rigidity and strength so you can be sure that your Barrier Reef spa will last for years to come!

### SEALED AIR CAVITY

Beneath the spa's surface is a sealed air cavity, which thermally insulates the spa, retarding heat loss and saving you on energy costs.

### PVC EQUIPMENT\* MOUNTING

Adds support to the spa structure and reduces noise and vibrations.

### HI-GRADE ACRYLIC

The latest in spa technology, the hi-grade acrylic retains its high-gloss finish from everyday wear and tear — even sunlight!

This 3.2-3.8mm layer is easy to clean and easy to repair. Being chemical and stain resistant, this acrylic resists common household stains such as lipstick, hair dye, ink and crayon.

### VINYL ESTER RESIN AND GLASS

This chemical-resistant resin has high adhesive properties, bonding the resin and the acrylic layers. This resin is also osmosis proof, to increase protection for the acrylic underneath.

### AIR FILLED RESIN AND GLASS

A band of resin gives the spa strength and rigidity. The resin is also light, allowing you to move the spa when needed.

### HIGH DENSITY POLYURETHANE INSULATION FOAM

The foam insulates your Barrier Reef spa from heat loss, saving you money on energy!

\*FIBREGLASS CABINET NOT AVAILABLE IN DARWIN RANGE

# 10 REASONS TO BUY A BARRIER REEF SPA

- 1 10 Year Structural Warranty
- 2 Made in Australia
- 3 Made to the highest specifications
- 4 Highest Insulation available
